

## ELECTRIC LOVE

Sparks will fly with this dynamic column!

**Estimated Cost:** \$35 | **Labor:** 30 minutes | **Suggested Retail Price:** \$75-\$90

### Instructions:

1. Air-inflate two 11-inch Wild Berry latex to 9 inches (23cm) and tie the necks together to create a pair. Repeat with one Wild Berry round and one Wild Berry Quick Link to create a second pair. Twist the two pairs together to create a four-balloon cluster. Using the neck of one of the balloons, tie sand weight into the first cluster.
2. Air-inflate two 6-inch Red Hearts to 5 inches (13cm) and tie the necks together to create a pair. Repeat to create a second pair. Twist the two pairs together to create a four-balloon cluster. Repeat the process to create a second cluster and set aside. Using the neck of one balloon from the cluster, tie this cluster into the cluster from Step 1.
3. Air-inflate Wild Berry 646Q to 24 inches (61 cm) and use the neck to tie into the heart cluster.
4. Tie the second heart cluster from Step 2 to the uninflated end of the 646Q from Step 3.
5. Following the process from Step 1, create a 7-inch four-balloon cluster and tie to the top of the heart cluster from Step 4. Make sure the Quick Links in the top and bottom clusters are diagonal to each other.
6. Helium-inflate the "You Turn Me On!" Microfoil and roll the neck of the balloon up using a 260Q scrap. Tie into the top cluster.
7. Air-inflate three Caribbean Blue 260Qs, leaving 6 inches (15cm) uninflated in each. Wrap one tightly around the middle of the Wild Berry 646Q, create a pinch twist to lock it in place, and discard excess balloon. Set other two 260Qs aside.
8. Air-inflate two Onyx Black 160Qs leaving 6 inches uninflated in each. Wrap one tightly around the middle of the Wild Berry 646Q on top of the Caribbean Blue 260Q from Step 7, create a pinch twist to lock it in place, and discard excess balloon.
9. Using the method from Steps 7 and 8, attach a Caribbean Blue 260Q on top of the Onyx Black 160Q from Step 8, then attach an Onyx Black 160Q above, and another Caribbean Blue 260Q.
10. Make an Onyx Black Curly 160Q (see "Curly 160Q"). Attach the neck of one into the pinch twist of the bottom 160Q from Step 8. Create two pinch twists on the opposite end and wrap onto the tip of the Quick Link in the bottom Wild Berry four-balloon cluster. Create a second Onyx Black Curly 160Q. Create two pinch twists at the back end. Attach the neck to the top 160Q from Step 9 and wrap the pinch twists onto the tip of the Quick Link in the top Wild Berry four-balloon cluster.

*This design was created by Mike and Sara Harrits, CBA, For Every Occasion – Balloon Artists, Ryhl UK, using Qualatex Balloons.*
